The legal representative of the Company during the period and up to the date of the financial statements is as follows:

Mr. Nguyen Thanh Phong General Director

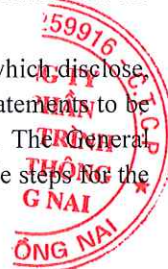

4. Commitment of the General Management

The General Management is responsible for the preparation of the financial statements which give a true and fair view of the financial position of the Company as at June 30, 2025, comprising the Balance Sheet, the Income Statement and the Cash Flow Statement for the year then ended. In preparing these financial statements, the General Management has taken into account and complied with the following matters:

- Select suitable accounting policies and apply them consistently;
- Make judgements and estimates that are reasonable and prudent;
- The financial statements are prepared on the going concern basis unless it is inappropriate to presume that the Company will continue business as a going concern.

The General Management is responsible for ensuring that proper accounting records are prepared and kept which disclose, with reasonable accuracy at any time, the financial position of the Company and which enable financial statements to be prepared in compliance with the accounting regime set out in the Notes to the Financial Statements. The General Management is also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

For and on behalf of the General Management

Dong Nai, July 29, 2025

Construction Materials Store No. 2	Village 5, Thong Nhat Commune, Bu Dang District, Binh Phuoc Province

8. **Statement on comparability of information in Financial Statements**

The selection of data and information to be presented in the financial statements is made on the principle of comparability between corresponding accounting periods.

II. ACCOUNTING YEAR, CURRENCY USED IN ACCOUNTING

1. **Accounting year**

The Company's accounting year begins on January 1 and ends on December 31 of each year.

2. **Currency used in accounting**

Vietnamese Dong (VND) is used as the currency for accounting records.

III. APPLICABLE ACCOUNTING STANDARDS AND REGIMES

1. Applicable accounting regime

The Company applies the Vietnamese Accounting Regime for Enterprises as guided in Circular No. 200/2014/TT-BTC issued by the Ministry of Finance of Vietnam on December 22, 2014 and its amended and supplemented circulars.

2. Statement on compliance with accounting standards and accounting regimes.

We have conducted the accounting work to prepare and present the financial statements in compliance with Vietnamese accounting standards, Vietnamese accounting regime for enterprises and relevant legal regulations. The financial statements have been presented in a true and fair manner on the financial position, business performance and cash flows of the enterprise.

The selection of data and information required to be presented in the Notes to financial statements is carried out according to the materiality principles prescribed in Vietnamese Accounting Standard No. 21 "Presentation of financial statements".

IV. APPLICABLE ACCOUNTING POLICIES

1. Types of exchange rates applied in accounting

The company translates foreign currencies into Vietnamese Dong based on actual transaction exchange rates.

Determination of the actual transaction rate

All foreign currency transactions generated during the period are accounted for at the actual exchange rate at the time of transaction.

The closing balance of monetary items dominated in foreign currency is revalued at the actual transaction exchange rate announced at the time of preparing the financial statements.

- Actual transaction exchange rate when revaluing monetary items dominated in foreign currency classified as assets: applied according to the Bank's foreign currency buying rate.

- Actual transaction exchange rate when revaluing monetary items dominated in foreign currency classified as liabilities: applied according to the Bank's foreign currency selling rate.

Exchange rate differences generated during the period from foreign currency transactions are recognized in the income statement. Exchange rate differences generated from revaluation of monetary items dominated in foreign currency at the end of the financial period after offsetting the increase or decrease difference are recognized in the income statement.

2. Cash

Cash includes cash in hand and demand bank deposits.

3. Financial investments

Held-to-maturity investments

Held-to-maturity investments consist of: term bank deposits and held-to-maturity loans for the purpose of earning periodic interest and other held-to-maturity investments.

Held-to-maturity investments are initially recognized at historical cost, which includes the purchase price and any costs associated with the purchase of investments. After initial recognition, if no provision for bad debts has been made in accordance with the law, these investments are evaluated at their recoverable value. When obtaining strong evidence that part or all of the investment may not be recovered, the loss is recognized as financial expenses during the period and as decrease in the investment value.

Investments in Subsidiaries and Associates

Investment in a Subsidiary is recognized when the Company holds more than 50% of the voting rights and has the right to control the financial and operating policies so as to obtain economic benefits from operations of the subsidiary. When the Company no longer holds control over the Subsidiary, the investment in the Subsidiary is recognized as decrease.

Investment in an Associate is recognized when the Company holds from 20% to less than 50% of the voting rights of the investees, has significant influence in decisions on financial and operating policies at these companies.

Investments in Subsidiaries and Associates (continued)

Investments in Subsidiaries and Associates are initially recognized at historical cost and are not adjusted thereafter for changes in the investors' share of the investee's net assets. The historical cost includes the purchase price and any costs directly attributable to the investment. In the case of investments in non-monetary assets, the cost of the investment is recognized at the fair value of the non-monetary assets at the time of generation. Provision for losses of investment in Subsidiaries and Associates is made when the enterprise receiving contributed capital suffers a loss, resulted in the Company's possibility to loss of capital or when the value of investments in Subsidiaries and Associates impairs in value. The basis for making a provision for investment losses is the financial statements of the investee.

Investments in other entities

Investments in other entities mean an investment by the Company in the equity instruments of another entity but having no control or joint control, and no significant influence over the investee.

Investments are recognized at historical cost, including purchase price and costs directly attributable to the investment. In the case of investments in non-monetary assets, the cost of the investment is recognized at the fair value of the non-monetary assets at the time of generation.

For investments that the Company holds for a long term (not classified as trading securities) and has no significant influence over the investee, the provision for losses is made as follows:

+ For investments in listed shares or fair value of the investment reliably measured, the making for a provision is based on the market value of shares.

+ For investments whose fair value cannot be measured at the reporting date, the provision is made based on the loss of the investee. The basis to make a provision for loss of investment in other entities is the consolidated financial statements of the investee (if this company is the Parent company), the financial statements of the investee (if this company is an independent enterprise with no Subsidiaries).

4. Trade and other receivables

Receivables: at historical cost less provision for bad debts.

The classification of receivables as trade receivables, internal receivables and other receivables depends on the nature of transaction or the relationship between the company and the receivable subject.

Method of making a provision for bad debts: a provision for bad debts is estimated for the lost value of receivables and other held-to-maturity investments with a similar nature to receivables that are difficult to recover and are overdue, not overdue but may not be collected because the debtor is unable to pay due to its bankruptcy, undergoing dissolution procedures, missing, escape...

5. Construction in progress

Construction in progress is stated at historical cost. This cost includes all costs necessary to acquire new fixed assets.

This cost is carried forward to increase assets when the project is completed, the overall acceptance is completed, the assets are handed over and put into ready-to-use state.

6. Inventories

Principles for recognition of inventories: Inventories are stated at historical cost (-) minus provisions for devaluation and provisions for obsolete and impaired inventories.

The historical cost of inventories is measured as follows:

- Raw materials, materials, goods: include purchase price, transportation costs and other directly related costs incurred in bringing the inventories to their present location and condition.

- Work in progress: includes costs of main raw materials, direct labor and general production costs incurred during the production process.

6. **Inventories (continued)**

Inventory valuation method: weighted average.

Inventory accounting: Perpetual inventory method.

Method of making a provision for inventories: A provision for inventories is made when the net realizable value of inventories is less than the historical cost. Net realizable value is the estimated selling price less the estimated cost of completion and estimated selling expenses. The amount of a provision for devaluation of inventories is the difference between the historical cost of inventories and their net realizable value. A provision for devaluation of inventories is made for each inventory item whose historical cost is greater than its net realizable value.

7. **Prepaid expenses**

Prepaid expenses at the Company consist of actual expenses that have been incurred but are related to the business performance during various accounting periods. The Company's prepaid expenses include the following: costs of tools and instruments; costs of quarry exploitation; compensation costs; other prepaid expenses.

Prepaid expense amortization method: The calculation and amortization of prepaid expenses into business operating expenses for each period use the straight-line method. Based on the nature and level of each expense, the amortization period is as follows: short-term prepaid expenses amortized within 12 months; long-term prepaid expenses amortized from 12 months to 36 months. In addition,

+ Exploitation costs at Tan Cang Quarry: amortized based on actual mining output.

+ Exploitation costs at Dak Lua Sand Mine: amortized based on the permitted mining period.

8. **Fixed assets**

8.1 **Tangible fixed assets**

Tangible fixed assets are stated at their historical cost minus (-) accumulated depreciation. Historical cost is all costs incurred by the enterprise to acquire the fixed asset up to the time the asset is ready for use as expected. Expenses incurred after initial recognition are only stated as an increase in the historical cost of fixed assets if these expenses certainly increase future economic benefits from the use of the asset. Expenses that fail to satisfy the above conditions are stated as expenses in the period.

When fixed assets are sold or disposed of, their historical cost and accumulated depreciation are written off and any gain or loss arising from their disposal is included in income or expense for the period.

8.2 **Financial lease fixed assets**

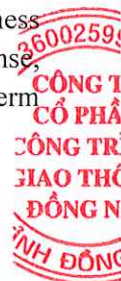

Principles for recognition of financial lease fixed assets: Financial lease fixed assets are stated at historical cost less accumulated depreciation. The historical cost of financial lease fixed assets is the lower of the fair value of the leased asset at the inception of the lease and the present value of the minimum lease payments plus initial direct costs incurred in connection to the financial lease. All other leases that are not financial leases are considered operating leases.

8.3 **Method of depreciation of fixed assets**

Fixed assets are depreciated using the straight-line method over their estimated useful lives. The estimated useful life means the period over which the asset is useful for production and business.

The estimated useful life of the fixed assets is as follows:

<i>Buildings and structures</i>	<i>04 - 32 year</i>
<i>Plant and equipment</i>	<i>03 - 09 years</i>
<i>Means of transport and transmission</i>	<i>06 - 11 years</i>
<i>Management equipment and tools</i>	<i>06 years</i>
<i>Financial lease fixed assets</i>	<i>06 years</i>

9. Liabilities

Liabilities are stated at historical cost and not less than the payment obligation.

The Company classifies liabilities as trade payables, internal payables, and other payables depending on the nature of the transaction or the relationship between the Company and the payable subject.

Liabilities are tracked in detail by payment term, payable entity, original currency payable (including revaluation of liabilities that satisfy the definition of monetary items dominated in foreign currency) and other factors according to the Company's management needs.

At the time of preparing financial statements, the Company immediately records a payable when obtaining evidence that a loss is likely to occur in accordance with the principle of prudence.

10. Borrowings and financial lease liabilities

The value of borrowings is recognized as the aggregate sum borrowed from banks, financial institutions, financial companies and other entities (excluding loans in the form of bond issuance or preferred share issuance with terms requiring the issuer to repurchase at a certain time in the future).

Financial lease liabilities are recognized as the aggregate sum payable, calculated at either the present value of the minimum lease payments or the fair value of the leased asset.

Borrowings and financial lease liabilities are tracked in detail for each creditor, each debtor, each debt agreement and each type of borrowed asset.

11. Borrowing costs

Principles for recognition of borrowing costs: interest costs and other costs incurred directly related to the enterprise's loans are recognized as production and business expenses in the period, except when these costs generate from loans directly related to investment in construction or production of unfinished assets and are included in the value of such asset (capitalized) when the conditions specified in accounting standard No. 16 "Borrowing costs" are satisfied.

12. Payable expenses

Payable expenses include loan interest expenses; salary and bonus expenses; transportation expenses; ... incurred in the reporting period but not actually paid. Salary and bonus expenses payable to employees are recognized in production and business expenses in the period according to the principle of matching between revenue and expenses.

13. Bond issuance costs

Transaction costs in connection to the issuance of bonds are amortized to the income statement over the bond term using the straight-line method. At the time of initial recognition, bond issuance costs are written down against the principal of the bond.

14. Wages and compulsory insurances

Wages are calculated and included into expenses during the period according to the Employment Contract and the Company's Salary Regulations. Accordingly, social insurance, health insurance and unemployment insurance are also made at the rates of 25.5%, 4.5% and 2% respectively of the employee's wages. The rate of 21.5% will be included in the cost of social insurance, health insurance and unemployment insurance during the period; and 10.5% will be deducted from the employee's base salary.

15. Business Cooperation Contract (BCC)

The Company recognizes the amounts contributed to the initial BCC at historical cost and states them as other receivables.

The Company recognizes the amounts received for BCC at historical cost and states them as other liabilities, does not include them in equity.

BCC profit sharing

In case the Company carries out BCC profit sharing

If the BCC stipulates that other parties to the BCC may receive a fixed profit, the Company recognizes all revenue, expenses and after-tax profit of the BCC on the Income Statement; Recognizes all after-tax profit of the BCC in the "Undistributed after-tax profit" item of the Balance Sheet.

In case the Company carries out BCC profit sharing (continued)

If the BCC stipulates that other parties to the BCC may share profits only if the BCC's operations are profitable, and must bear losses, the Company applies the BCC revenue sharing accounting method to recognize revenue, expenses and business performance corresponding to the share as agreed in the BCC.

In case the Company receives profits shared from BCC

If the BCC stipulates that other parties to the BCC may receive a fixed share of profits, the Company recognizes asset rental income for the amount shared from the BCC.

If the BCC stipulates that other parties to the BCC may receive profit sharing only if the BCC's operations are profitable, and must bear losses, the Company recognizes the revenue and expenses corresponding to its share from the BCC.

16. Equity

Principles for recognition of paid-in capital: Paid-in capital is formed from the initially contributed capital and additionally contributed capital from shareholders. Paid-in capital is recognized according to the capital actually contributed in cash or assets calculated according to the par value of shares issued when the Company was first incorporated, or additionally mobilized to expand the Company's scale of operations.

Capital surplus: States the increase in the difference between the share issuance price compared to the par value when first issuance or additional issuance of shares and the increase or decrease in the difference between the actual proceeds compared to the repurchase price when reissuing treasury shares. In case of repurchasing shares for cancellation on the date of purchase, the value of shares recognized as a reduction in the business capital on the date of purchase is the actual repurchase price and the detailed business capital must also be recorded as a reduction according to the par value and the capital surplus of the repurchased shares.

Undistributed profits

Undistributed after-tax profit is recognized as the profit (or loss) from the Company's business performance after deducting (-) corporate income tax expenses of the current period and adjustments due to retroactive application of changes in accounting policies, retroactive adjustment of material errors of previous years.

Profit distribution is based on the Company's charter and approved by the annual General Meeting of Shareholders.

17. Cost of goods sold

Cost of goods sold states the cost of products, goods, and services delivered during the period and other expenses recognized in cost of goods or recognized as decrease in cost of goods during the reporting period. Cost of goods is recognized at the time of transaction or when it is relatively certain that it will occur in the future, regardless of whether money has been spent or not. Cost of goods sold and revenue are recognized simultaneously according to the principle of matching.

18. Revenue and other income

Sales revenue

Sales revenue is recognized when the following 5 conditions are simultaneously met: 1. The enterprise has transferred most of the risks and benefits associated with ownership of the products or goods to the buyer; 2. The enterprise no longer retains management rights over the goods as the owner of the goods or control over the goods; 3. Revenue is determined with reasonable certainty. When the contract stipulates that the buyer has the right to return the purchased products or goods under specific conditions, the enterprise can only recognize revenue when those specific conditions no longer exist and the buyer does not have the right to return the products or goods (except for returns in the form of exchanges for other goods or services); 4. The enterprise has received or will receive economic benefits from the sales transaction; 5. The costs related to the sales transaction can be determined.

Revenue from services rendering

Revenue from transactions on service provision is recognized when the outcome of that transaction can be reliably determined. In cases where transactions on service provision relate to multiple periods, revenue is recognized in the period based on the portion of work completed as of the Balance Sheet date for that period. Revenue from service provision is recognized when all four (4) conditions are simultaneously met: 1. Revenue is determined with reasonable certainty. When the contract stipulates that the buyer has the right to return services purchased under specific conditions, the enterprise can only recognize revenue when those specific conditions no longer exist and the buyer does not have the right to return the services provided; 2. The enterprise has received or will receive economic benefits from that transaction on service provision; 3. The portion of work completed can be determined at the Balance Sheet date; 4. The costs incurred for the transaction and the costs to complete the transaction on service provision can be determined.

If the outcome of the contract cannot be reliably determined, revenue will only be recognized to the extent of the recoverable amount of costs that have been recognized.

Financial revenue

Revenue from financial activities reflects revenue from interest, dividends, shared profits, and other financial activities of the enterprise (investments in securities trading, liquidation of investment capital contributions in associates, subsidiaries, other capital investments; foreign exchange gains; capital transfer gains) etc.

Revenue arising from interest, dividends, and shared profits of the enterprise is recognized when simultaneously satisfying 2 conditions: 1. It is possible to obtain economic benefits from that transaction; 2. Revenue can be determined with reasonable certainty.

- Interest is recognized on a time basis and actual interest rate for each period.
- Dividends and shared profits are recognized when shareholders have the right to receive dividends or capital contributing parties have the right to receive profits from capital contribution.

When it is not possible to recover an amount that was previously recorded as revenue, the potentially unrecoverable or uncertainly recoverable amount must be recorded as an expense incurred in the period, not as a reduction in revenue.

19. Financial expenses

Financial expenses include: Expenses or losses related to financial investment activities, lending and borrowing costs, capital contributions to associates; provisions for financial investment devaluation, losses from foreign currency sales, foreign exchange losses, and other financial expenses.

Financial expenses are recorded in detail for each expense item when actually incurred during the period and are reliably measured when there is sufficient evidence of these expenses.

20. Selling expenses and General & Administrative expenses

a. Selling expenses

Reflecting actual costs incurred in the process of selling products and goods or providing services, including sales promotion, product introduction, advertising, sales commissions, product warranty costs (except for construction and installation activities), storage, packaging, transportation costs, ...

b. General & Administrative expenses

Reflecting the general and administrative expenses of the enterprise including salaries of administrative staff; social insurance, health insurance, union dues, unemployment insurance for administrative staff; costs of office supplies and working tools, depreciation of fixed assets used for business administration; business license taxes; provisions for doubtful debts; outsourced services; other cash expenses.

21. Corporate income tax expense

Corporate income tax expense includes current corporate income tax expense and deferred corporate income tax expense incurred during the year, which serve as the basis for determining the after-tax business outcome of the Company for the current fiscal year.

Current corporate income tax expense is the amount of corporate income tax payable, calculated on taxable income during the year and the current corporate income tax rate.

21. Corporate income tax expense (continued)

Deferred corporate income tax expense is the amount of corporate income tax payable in the future arising out of the recognition of deferred income tax liabilities during the year and the reversal of deferred income tax assets recognized in previous years. The company does not reflect in this account deferred income tax assets or deferred income tax liabilities arising out of transactions that are recognized directly in owner's equity.

Deferred corporate income tax income is the reduction in deferred corporate income tax expense arising out of the recognition of deferred income tax assets during the year and the reversal of deferred income tax liabilities that were recognized in previous years.

The Company only offsets deferred income tax assets and deferred income tax liabilities when the Company has a legal right to offset current income tax assets against current income tax liabilities, the deferred income tax assets and the deferred income tax liabilities relate to corporate income taxes levied by the same tax authority on the same taxable entity, and the Company intends to settle its current income tax liabilities and current income tax assets on a net basis.

Tax amounts payable to the State budget will be finalized specifically with the tax authorities. Any differences between the tax amounts payable under the books and the inspection figures will be adjusted when there is an official settlement with the tax authorities.

Due to uncertainty about future taxable profits, the Company did not recognize deferred income tax assets for unutilized tax losses.

The corporate income tax rate applicable to the company for the current year is 20%.

22. Stakeholders

Stakeholders are enterprises and individuals that directly or indirectly, through one or more intermediaries, control, or are controlled by, or are under common control with the Company. Associates and individuals owning, directly or indirectly, an interest in the voting right of the Company that gives them significant influence over the Company, key management personnel including General Management and Board of Directors, close members of the family of these individuals or associates or companies associated with these individuals also constitute stakeholders. In considering each possible stakeholder relationship, attention is directed to the substance of the relationship, not merely the legal form.

23. Financial instruments

Initial recognition

Financial assets

Under Circular No. 210/2009/TT-BTC dated November 06, 2009 ("Circular No. 210"), financial assets are classified appropriately, for purposes of the Notes to the financial statements, into financial assets recorded at fair value through the Income Statement, loans and receivables, held-to-maturity investments and available-for-sale financial assets. The Company determines the classification of these financial assets at the time of initial recognition.

At the time of initial recognition, financial assets are measured at historical cost plus directly attributable transaction costs.

The financial assets of the Company include cash and deposits, trade receivables, loan receivables and other receivables.

Financial liabilities

Financial liabilities, within the scope of Circular No. 210, for purposes of the Notes to the Financial Statements, are classified appropriately into financial liabilities recognized through the Income Statement, financial liabilities determined at amortized cost. The Company determines the classification of financial liabilities at the time of initial recognition.

All financial liabilities are initially recognized at original cost plus directly attributable transaction costs.

The financial liabilities of the Company include trade payables, other payables, debts and borrowings.

Value after initial recognition

There are currently no requirements for re-measurement of financial instruments subsequent to initial recognition.

Offset of financial instruments

Financial assets and financial liabilities are offset and the Net Realizable Value is reported in the financial statements if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.

10. Financial Risk Management Objectives and Policies

The primary risks arising out of financial instruments include market risk, credit risk, and liquidity risk.

The General Management reviews and applies risk management policies for the aforementioned risks as follows:

Market risk refers to the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market prices. Market risk includes three main types: interest rate risk, currency risk, and other price risks, such as equity price risk. Financial instruments affected by market risk include cash, trade receivables, other receivables, trade payables, loans, and other liabilities.

These sensitivity analyses have been prepared based on the net debt value, the ratio of fixed-interest-rate liabilities to floating-interest-rate liabilities, and the assumption that the correlation between foreign currency-denominated financial instruments remains unchanged.

Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market interest rates. The exposure to market risk of the Company arising out of interest rate fluctuations primarily relates to its borrowings, liabilities, cash, loans, and short-term deposits.

The Company manages interest rate risk by analyzing the competitive landscape in the market to secure favorable interest rates that align with its objectives while remaining within its risk management limits.

Foreign Exchange Risk

Foreign exchange risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in exchange rates. The Company is exposed to risks arising out of exchange rate fluctuations, which directly impact its business operations conducted in currencies other than the Vietnamese Dong.

The Company manages foreign exchange risk by assessing current and anticipated market conditions when planning future foreign currency transactions. The Company does not utilize any derivative financial instruments to hedge against foreign exchange risks.

Foreign Currency Sensitivity

The Company does not perform a foreign currency sensitivity analysis as the impact of exchange rate fluctuations on the financial statements at the reporting date is considered insignificant.

Equity Price Risk

Both listed and unlisted shares held by the Company are subject to market risks arising out of the uncertainty of future investment values. The Company manages equity price risk by establishing investment limits. Additionally, the General Management of the Company reviews and approves investment decisions related to equity securities.

Credit risk

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily trade receivables) and from its financing activities, including deposits with banks, foreign exchange transactions and other financial instruments.

Almost all of the operating capital of the Company is mainly focused on investment cooperation, especially individual investment cooperation. The Company recognizes that there are risks, but because the General Meeting of Shareholders and the Board of Directors of the Company have approved them in Resolutions, Decisions ..., the Company recognizes that this investment cooperation can bring benefits to the Company, and the Company believes in the ability to recover this investment cooperation.

Trade receivables

The Company minimizes credit risk by only dealing with financially sound entities. The Company regularly monitors receivables closely to urge collection. On this basis, and the receivables of the Company are related to many different customers, so credit risk is not concentrated on a certain customer.

Loan receivables

The Company minimizes credit risk by only dealing with entities and individuals who are related parties with good financial capacity with the loan limit, term and purpose specified in the Financial Regulations and each specific contract. The Company finds that the credit risk for loan receivables is low.

Bank deposit

The Company mainly maintains deposits with reputable large banks in Vietnam. The Company considers that the concentration of credit risk from bank deposits is low.

The General Management of the Company assesses that most of the financial assets are current and not impaired because these financial assets are related to reputable and solvent customers except for overdue receivables.

Liquidity risk

Liquidity risk is the risk that the Company will have difficulty in fulfilling its financial obligations due to lack of capital. The liquidity risk of the Company arises mainly out of the fact that the financial assets and the financial liabilities have different maturity dates.

The Company monitors liquidity risk by maintaining a level of cash and cash equivalents and bank borrowings deemed adequate by the General Management to finance the operations of the Company and to mitigate the effects of fluctuations in cash flows.

The table below summarizes the maturity of the financial liabilities of the Company based on contractually expected payments on an undiscounted basis:

June 30, 2025	Under 1 year	From 1 to 5 years	Over 5 years	Total
Loans and debts	366,638,000,000	240,639,704,179	-	607,277,704,179
Trade payables	70,718,894,077	-	-	70,718,894,077
Other payables and accrued expenses	86,839,835,861	2,696,883,950	-	89,536,719,811
Total	524,196,729,938	243,336,588,129	-	767,533,318,067
December 31, 2024	Under 1 year	From 1 to 5 years	Over 5 years	Total
Loans and debts	346,721,645,833	241,339,579,177	-	588,061,225,010
Trade payables	81,252,643,607	-	-	81,252,643,607
Other payables and accrued expenses	79,799,013,240	2,696,883,950	-	82,495,897,190
Total	507,773,302,680	244,036,463,127	-	751,809,765,807

Liquidity risk is high. The Company believes it has access to sufficient funding where necessary, and borrowings maturing within 12 months can be rolled over with existing lenders.

Collateral

The Company has used fixed assets as collateral to secure short-term and long-term loans from banks (Note 18 – Borrowings and financial lease liabilities).

The Company used third-party assets as collateral as of January 31, 2022 (Note 18 – Borrowings and finance lease liabilities).

11. Financial assets and financial liabilities (page 33)

The fair value of financial assets and financial liabilities is reflected at the amount at which the financial instrument could be exchanged in a current transaction between willing parties, other than in a forced sale or liquidation.

The Company uses the following methods and assumptions to estimate fair value:

The fair value of cash and short-term deposits, trade receivables, trade payables and other short-term liabilities is equivalent to the carrying amount of these items because these instruments have short maturities.

The fair value of listed securities and financial debt instruments is determined at market value.

For unlisted securities investments that are frequently traded, fair value is determined as the average price provided by three independent securities companies at the end of the fiscal year.

The fair value of securities and financial investments whose fair value cannot be measured with certainty due to the lack of a highly liquid market for these securities and financial investments is presented at carrying amount.

Except for the items mentioned above, the fair value of long-term financial assets and financial liabilities has not been formally assessed and determined as at December 31, 2025 and December 31, 2024. However, the General Management of the Company assesses that the fair value of these financial assets and financial liabilities is not materially different from the carrying amount at the end of the accounting period.
