V. STATEMENT OF RESPONSIBILITY OF THE GENERAL MANAGEMENT FOR THE CONSOLIDATED FINANCIAL STATEMENTS

The General Management is responsible for preparing the Company's consolidated financial statements for the 2nd Quarter of 2025, which fairly reflect the Company's pre-consolidation financial position as of June 30, 2025. The pre-consolidation business results and pre-consolidation cash flows for the 2nd Quarter of 2025 ended on the same day. In preparing these consolidated financial statements for the 2nd Quarter of 2025, the General Management of the Company commits to comply with the following requirements:

- Establish and maintain controls that the General Management determines are necessary to enable the preparation and presentation of financial statements that are free from material misstatement, whether due to fraud or error;
- Select suitable accounting policies and apply them consistently;
- Make judgements and estimates that are reasonable and prudent;
- The applicable accounting standards have been complied with by the Company, and there are no material deviations that need to be disclosed and explained in these financial statements.
- Prepare the consolidated financial statements for the 2nd Quarter of 2025 on a going concern basis unless this basis is no longer appropriate.

The General Management of the Company believes that the accounting books are kept reflecting the consolidated financial situation of the Company, with a fair and reasonable level at any time and ensure that this Financial Statement has complied with the current regulations of the State. At the same time, it is responsible for ensuring the safety of the Company's assets and taking appropriate measures to prevent and detect fraud and other violations.

The General Management believes that the Consolidated Financial Statements give a true and fair view of the Company's financial position as of June 30, 2025, its business performance and cash flows for the first quarter ended on the same date, in accordance with Vietnamese accounting standards and regulations and comply with relevant current regulations.

VI. OTHER COMMITMENTS

The General Management believes that the Company did not violate its information disclosure obligations as prescribed in Circular No. 96/2020/TT-BTC dated November 16, 2020 issued by the Ministry of Finance on guidance on information disclosure on the stock market.

VII. APPROVAL OF FINANCIAL STATEMENTS

We, the General Management of DONA Transportation Construction Joint Stock Company, approve the Company's Consolidated Financial Statements for the 2nd Quarter of 2025.

Dong Nai, July 29, 2025

On behalf of the General Management
Deputy General Director

Nguyễn Khoa

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the accounting period from April 1, 2025 to June 30, 2025

I. CHARACTERISTICS OF THE COMPANY'S OPERATIONS

1. Form of capital ownership

DONA Transportation Construction Joint Stock Company was established and operates under the Certificate of Business Registration of Joint Stock Company No.: 3600259916; first issued on December 30, 2005, and registered for the 18th change on July 7, 2023, issued by the Department of Planning and Investment of Dong Nai province. In which:

Charter capital: 790,000,000,000 VND. In words: Seven hundred and ninety billion dong only.

Head office: No. 200 Nguyen Ai Quoc, Trang Dai Ward, Bien Hoa City, Dong Nai Province.

2. Business fields

- Public career services: Management and maintenance of road traffic infrastructure in Ho Chi Minh City, maintenance of inland waterway works.

- Carry out business projects: Construction of works on traffic, water supply, drainage, electricity, post office, irrigation.

- Construction materials business: Production and trading of hot asphalt concrete and asphalt emulsion...

3. Normal business and production cycle: 12 months

4. Characteristics of the Company's operations during the fiscal year that affect the Financial Statements

The Company primarily performs contracts for ordering the supply of public service products and construction works using State budget funds, so the settlement process takes a long time, and when policies change, it will greatly affect the settlement value, changing the Company's production and business results.

5. Operating model

The company has 06 subsidiaries, 2 affiliated enterprises and 2 dependent accounting stores without legal status.

6. Total number of employees as of June 30, 2025: 31 employees (June 30, 2024: 48 employees).

II. ACCOUNTING PERIOD, CURRENCY USED IN ACCOUNTING

1. Accounting period

The Group's fiscal year begins on January 1 and ends on December 31 each year.

2. Currency

The currency used in accounting records is Vietnamese Dong (VND).

III. ACCOUNTING STANDARDS AND REGIMES

1. Accounting regime

The Company applies the Enterprise Accounting Regime issued under Circular No. 200/2014/TT/BTC and Circular No. 202/2014/TT/BTC dated December 22, 2014 of the Ministry of Finance and supplementary and amending Circulars.

2. Statement on Compliance with Accounting Standards and Accounting Regime

The Company has applied Vietnamese Accounting Standards and documents guiding the Standards issued by the State. Financial statements are prepared and presented in accordance with the provisions of the standards, circulars guiding the implementation of applicable accounting standards and regimes.

IV. APPLIED ACCOUNTING POLICIES

1. Consolidated basis

a. Subsidiary

DONA Transportation Construction Joint Stock Company and its subsidiaries

No. 200 Nguyen Ai Quoc, Trang Dai Ward, Dong Nai Province.

Subsidiaries are entities over which the Group has the power to govern the financial and operating policies, generally accompanying a shareholding of more than half of the voting rights. Current potential voting rights are taken into account in assessing control. The interim financial statements of subsidiaries are included in the interim consolidated financial statements from the date that control commences until the date that control ceases.

b. Non-controlling interests

Non-controlling interests are measured at the non-controlling interest's share of the net assets of the acquired entity at the acquisition date.

Divestments of the Group's interest in a subsidiary that do not result in a loss of control are accounted for similarly to equity transactions. The difference between the change in the Group's interest in the net assets of the subsidiary and the amount of the payment or receipt from the divestment of the subsidiary is recorded in retained earnings under equity.

c. Loss of control

When the Group loses control of a subsidiary, it derecognises the assets and liabilities of the subsidiary, as well as non-controlling interests and other equity items. Any gain or loss resulting from this event is recognised in the consolidated statement of income. After the disposal, the remaining interest in the former subsidiary (if any) is recognised at the carrying amount of the investment in the separate financial statements of the parent company, adjusted for changes in equity since the acquisition date if the Group retains significant influence on the investee, or at cost of the remaining investment if the Group no longer has significant influence.

d. Joint ventures and associates

Associates are entities over which the Group has significant influence, but not control, over the financial and operating policies. Joint ventures are entities over which the Group has joint control, established by written contractual agreement and requiring unanimous consent for strategic financial and operating decisions. Joint ventures and associates are typically entities in which the Group holds 20%-50% of the voting rights.

Joint ventures and associates are accounted for using the equity method. These investments are initially recognized at cost, including transaction costs. After initial recognition, the consolidated interim financial statements include the Group's share of the profits or losses of the joint ventures and associates, after adjustments to align the accounting policies with those of the Group, from the date that significant influence commences until the date that significant influence ceases.

When the Group's share of losses in a joint venture or associate exceeds the Group's interest in the joint venture or associate, the carrying amount of the investment (including long-term investments, if any) is reduced to zero and the recognition of future losses is discontinued except for losses to the extent that the Group has an obligation or has paid on behalf of the joint venture or associate.

e. Transactions eliminated on consolidation

Intra-group balances and unrealised income and expenses arising from intra-group transactions are eliminated in preparing the consolidated financial statements. Unrealised gains and losses arising from transactions with investees accounted for under the equity method are eliminated against the investment to the extent of the Group's interest in the investee.

f. Business combination

Business combinations are accounted for using the purchase method at the acquisition date, which is the date on which control is transferred to the Group. Control exists when the Group has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. The assessment of control takes into account potential voting rights that are currently exercisable.

g. Goodwill

Goodwill arises on the acquisition of subsidiaries, joint ventures and associates. Goodwill is measured at cost less cumulative amortisation. The cost of goodwill is the difference between the cost of acquisition and the group's interest in the net fair value of the assets, liabilities and contingent liabilities of the acquired entity. A negative difference (negative goodwill) is recognised immediately in the consolidated income statement.

Goodwill arising on the acquisition of a company is amortised on a straight-line basis over 10 years. The carrying amount of goodwill arising on the acquisition of a subsidiary is written down to recoverable amount when the Board of Directors determines that it is not fully recoverable.

2. Foreign currency

Transactions in foreign currencies other than VND during the period are converted to VND at the actual exchange rate on the transaction date.

Assets and liabilities denominated in currencies other than VND are translated into VND at the buying and selling rates of the commercial bank where the Company and its subsidiaries most frequently conduct transactions and have the largest foreign currency balance at the end of the accounting period, respectively.

All exchange differences are recorded in the consolidated income statement.

3. Principles of recording cash and cash equivalents

Cash and cash equivalents include cash, bank deposits, cash in transit and short-term investments with a maturity of no more than 03 months from the date of purchase, easily convertible to a known amount of cash and subject to an insignificant risk of change in value.

4. Principles of recording financial investments

These are investments outside the enterprise with the purpose of using capital reasonably to improve the efficiency of the enterprise's operations such as: capital contribution investment in subsidiaries, joint ventures, associates, securities investment and other financial investments...

Classify investments when preparing Financial Statements according to the following principles:

- Investments with a remaining recovery period of no more than 12 months or within one business production cycle are classified as short-term.
- Investments with a remaining recovery period of 12 months or more or over one business production cycle is classified as long-term.

It is an investment in purchasing securities and other financial instruments for business purposes (holding with the aim of waiting for price increase to sell for profit). Business securities include:

- Stocks and bonds listed on the stock market;
- Other types of securities and financial instruments such as commercial paper, forward contracts, swap contracts...

Trading securities are recorded at cost. Trading securities are recorded at the time when the investor acquires ownership.

The dividend paid for the period before the investment date is recorded as a reduction in the value of the investment. When an investor receives additional shares without having to pay money because the joint stock company issues additional shares from the capital surplus, other funds belonging to the owner's equity or distributes dividends in shares, the investor only monitors the number of additional shares.

In the case of stock exchange, the value of the shares must be determined according to the fair value at the exchange date.

When liquidating or selling trading securities, the cost is determined by the moving weighted average method for each type of securities.

DONA Transportation Construction Joint Stock Company and its subsidiaries

No. 200 Nguyen Ai Quoc, Trang Dai Ward, Dong Nai Province.

Provision for devaluation of trading securities: The portion of the value of the loss that may occur when there is solid evidence showing that the market value of the securities the Company is holding for business purposes has decreased compared to the book value. The provision or reversal of this provision is made at the time of preparing the Financial Statement and is recorded in the financial expenses of the period.

a. Held-to-maturity investments

This investment does not reflect bonds and debt instruments held for trading purposes with the aim of earning profit. Held-to-maturity investments include term deposits (remaining maturity of 3 months or more), treasury bills, promissory notes, bonds, preference shares that the issuer is required to redeem at a certain time in the future, loans held to maturity for the purpose of earning periodic interest and other held-to-maturity investments.

Provision for devaluation of held-to-maturity investments: for investments held to maturity that have not been provided for in accordance with the law, the Company must assess the possibility of recovery. In case there is certain evidence that a part or the whole of the investment may not be recoverable, the loss must be recorded in financial expenses in the period. The provision or reversal of this provision is made at the time of preparing the Financial Statement. If the loss cannot be reliably determined, the investment is not recorded as a decrease and the recovery of the investment is explained in the Notes to the Financial Statements.

b. Investments in subsidiaries, joint ventures and associates

Investments in subsidiaries and associates are accounted for using the cost method. Net profits distributed from subsidiaries and associates arising after the date of investment are recorded in financial revenue for the period. Other distributions (other than net profits) are considered as recovery of investments and are recorded as deductions from the cost of investment.

Provision for investment losses in other entities: losses due to subsidiaries, joint ventures, and associates making losses that may result in the investor losing capital or provisions due to the decline in the value of these investments. The provision or reversal of this provision is made at the time of preparing the Financial Statement for each investment and is recorded in financial expenses during the period.

In addition, the subsidiaries of the Group have announced temporary suspension of operations due to inefficiency. These conditions indicate the existence of a material uncertainty that may cast significant doubt on the ability of the Subsidiary to continue as a going concern. Therefore, the basis for preparing the consolidated statements is the assumption that the Subsidiary will continue to operate in the future.

5. Principles of recording receivables

Receivables are tracked in detail by receivable terms, receivable entity, original currency and other factors according to the Company's management needs.

The classification of receivables is carried out according to the following principles:

- Trade receivables: commercial receivables arising from purchase-sale transactions between the Company and buyers such as sales, provision of services, liquidation/sale of assets, export sales proceeds of the consignor through the consignee;
- Internal receivables: receivables between a superior unit and a subordinate unit without legal entity status and dependent accounting;
- Other receivables: receivables of a non-commercial nature, not related to purchase-sale transactions.

Classify receivables when preparing Financial Statements according to the following principles:

- Receivables with a remaining collection period of no more than 12 months or within one business production cycle are classified as short-term.

DONA Transportation Construction Joint Stock Company and its subsidiaries

No. 200 Nguyen Ai Quoc, Trang Dai Ward, Dong Nai Province.

- Receivables with a remaining collection period of 12 months or more or over 1 business production cycle are classified as long-term.

Provision for bad debts: bad debts are provisioned for bad debts when preparing the Financial Statements. The provisioning or reversal of this provision is made at the time of preparing the Financial Statements and is recorded in the business management expenses of the period. For bad debts that have lasted for many years and the Company has tried to use all measures to collect the debt but still cannot collect the debt and determines that the debtor is truly unable to pay, the Company may have to carry out procedures to sell the debt to a debt buying and selling company or write off the bad debts on the accounting books (implemented in accordance with the provisions of the Law and the Company's Charter).

In addition, the Company also has bad debts related to the approval of the settlement of SPDVCI projects constructed before the official conversion into a joint stock company, awaiting handling instructions from competent authorities.

6. Principles of recording inventory

Inventories are stated at cost. Where the net realizable value is lower than the cost price, the net realizable value should be used. The cost of inventories comprises costs of purchase, costs of conversion and other directly attributable costs incurred in bringing the inventories to their present location and condition. Net realizable value is the estimated selling price, less estimated selling expenses.

The value of ending inventory is determined by the first-in, first-out method.

Inventories are accounted for using the perpetual inventory method.

Provision for inventories is created for the estimated loss due to the decline in value of materials, finished goods, and inventories owned by the Company that may occur (devaluation, poor quality, obsolescence, etc.) based on reasonable evidence of impairment at the end of the fiscal year. Increases or decreases in this provision are recorded in the cost of goods sold in the Income Statement.

7. Tangible fixed assets

Tangible fixed assets are recorded at cost. During use, tangible fixed assets are recorded at original cost, accumulated depreciation and residual value.

The cost of fixed assets comprises the purchase price and any costs directly attributable to bringing the asset into use. The costs of purchasing, upgrading and renewing fixed assets are capitalised as fixed assets, and the costs of maintenance and repairs are recorded as expenses in the current year.

When assets are disposed of, their cost and accumulated depreciation are eliminated from the financial statements and any loss arising from their disposal is recorded in the income statement.

Fully depreciated fixed assets continue to be used because the Company performs well in maintaining and servicing motorbike equipment.

Depreciation is calculated using the straight-line method. The estimated depreciation period is as follows:

Asset type	Depreciation years
- Houses and structures	04 - 32 years
- Machinery and equipment	03 - 09 years
- Means of transport, transmission	03 - 11 years
- Management equipment	06 years
- Other assets	06 years

8. Finance lease fixed assets

DONA Transportation Construction Joint Stock Company and its subsidiaries

No. 200 Nguyen Ai Quoc, Trang Dai Ward, Dong Nai Province.

Assets are classified as finance leases if substantially all the risks and rewards of ownership are retained by the lessee. Finance leased fixed assets are stated at cost less accumulated depreciation. The cost of finance leased assets is the lower of the fair value of the leased asset at the inception of the lease and the present value of the minimum lease payments. The discount rate used to calculate the present value of the minimum lease payments and the interest rate implicit in the lease or stated in the contract. If the interest rate implicit in the lease cannot be determined, the borrowing rate at the inception of the lease is used.

Financial lease fixed assets are depreciated using the straight-line method over their estimated useful lives. If there is no reasonable certainty that the Group will obtain ownership at the end of the lease term, the assets are depreciated over the shorter of the lease term and the estimated useful life. The depreciation years for the various types of leased assets are as follows:

Asset type	Depreciation years
- Machinery and equipment	04 years

9. Construction in progress

Construction in progress reflects costs directly related to assets under construction, machinery and equipment being installed for production, leasing and management purposes as well as costs related to repairs of fixed assets in progress. These assets are recorded at original cost and are not depreciated.

10. Principles of recording prepaid expenses

Calculating and allocating prepaid expenses into production and business expenses for each accounting period is based on the nature and extent of each type of expense to select a reasonable and consistent method and criteria. Prepaid expenses are tracked according to each prepayment period incurred, allocated to cost-bearing objects of each accounting period and the remaining amount not allocated to expenses.

Classify prepaid expenses when preparing Financial Statements according to the following principles:

- Amounts paid in advance to provide goods and services within a period not exceeding 12 months or a normal business cycle from the time of prepayment are classified as short-term.
- Amounts paid in advance to provide goods and services for a period of more than 12 months or more than one normal business cycle from the time of prepayment are classified as long-term.

11. Principles of recording payables and accrued expenses

Payables and accrued expenses are recognized for amounts to be paid in the future related to inventories and services received. Accrued expenses are recognized based on reasonable estimates of the amount to be paid and monitored in detail by the remaining payment term of the payables, the payable subjects, the original currency of the payables and other factors according to the Company's management needs.

The classification of payables is carried out according to the following principles:

- Payables to suppliers: commercial payables arising from transactions of purchasing goods, services, assets and payables when importing through consignees;
- Internal payables: payables between a superior unit and a subordinate unit without legal entity status that is dependent on accounting;
- Other payables: payables that are not commercial in nature and are not related to the purchase, sale, or provision of goods or services.

DONA Transportation Construction Joint Stock Company and its subsidiaries

No. 200 Nguyen Ai Quoc, Trang Dai Ward, Dong Nai Province.

At the time of preparing the Financial Statements in accordance with the law, the Company re-evaluates the balance of payables in foreign currencies (except for prepayments from buyers; if at the time of preparing the report there is solid evidence that the Company cannot provide goods and services and the Company will have to return prepayments in foreign currencies, these amounts are considered foreign currency monetary items) at the foreign currency selling rate of the commercial bank where the Company regularly conducts transactions at the time of preparing the Financial Statements.

Payables for goods and services received from sellers or provided to buyers during the period but not actually paid due to lack of invoices or insufficient accounting records and documents, and payables to employees are recorded in production and business expenses during the period to ensure that when actual costs arise, they do not cause sudden changes in production and business expenses on the basis of ensuring the principle of matching between revenue and costs. The provision of prepaid costs must be calculated strictly and must have reasonable and reliable evidence. When such costs arise, if there is a difference with the amount already provided, the accountant will make an additional record or reduce the cost corresponding to the difference.

12. Business cooperation contract

Jointly controlled assets

The Group records in its financial statements business cooperation contracts in the form of jointly controlled assets with the following contents:

- * The Group's share of jointly controlled assets is classified according to the nature of the assets.
- * Liabilities arising separately from the Group.
- * The portion of the liability arising jointly with other joint venture capital contributors from the joint venture's operations.
- * Income from the sale or use of the joint venture's share of the products/services together with the joint venture's share of the expenses incurred from its operations.
- * The Group's expenses incurred in connection with the joint venture investment.

Fixed assets and investment real estate when contributed as capital to a business cooperation contract and ownership is not transferred to the joint venture parties shall not be recorded as a decrease in assets. If the Group receives assets contributed as capital to a joint venture, they shall be monitored as assets held on behalf of others and shall not be recorded as an increase in assets and business capital.

Fixed assets and investment real estate when contributed to a business cooperation contract with a transfer of ownership and in the process of constructing jointly controlled assets are recorded as a decrease in assets in the accounting books and the value of the assets is recorded as unfinished basic construction costs. After the jointly controlled assets are completed and put into use, based on the value of the assets divided, the Group records an increase in its assets in accordance with the purpose of use.

Jointly controlled business activities

The Group records in the consolidated financial statements business cooperation contracts in the form of jointly controlled business activities with the following contents:

- * Value of assets owned by the Group.
- * Liabilities incurred by the Group.
- * Revenue shared from the sale of goods or provision of services of the joint venture.
- * Costs to be incurred.

13. Principles for recording loans and financial lease liabilities, interest expenses

Loans in the form of bond issuance or preferred stock issuance with a clause requiring the issuer to repurchase at a certain time in the future are not reflected in this item.

Loans and debts need to be monitored in detail for each subject, each contract and each type of debt asset. Financial lease liabilities are reflected in the present value of the minimum lease payments or the fair value of the leased asset.

Borrowing costs directly related to borrowing are recorded in financial expenses in the period, except for borrowing costs directly related to the construction investment or production of a qualifying asset, which are included in the cost of that asset (capitalized) when meeting all the conditions specified in the Accounting Standard "Borrowing costs".

Borrowing costs directly attributable to the acquisition, construction or production of a qualifying asset are included in the cost of that asset (capitalized), including interest, amortization of discounts or premiums when issuing bonds, and additional costs incurred in connection with the borrowing process.

14. Ordinary bonds

The carrying amount of a bond is generally stated on a net basis as the face value of the bond plus the bond premium.

The Group monitors discounts and premiums for each type of issued bond and the allocation of each discount and premium when determining borrowing costs to be expensed or capitalized for each period, specifically:

- * Bond discounts are gradually allocated to each period's borrowing costs throughout the bond term.

- * Bond premium is gradually allocated to reduce borrowing costs each period during the term of the bond.

Amortization of the discount or premium may use the effective interest method or the straight-line method:

- * According to the effective interest rate method: The discount or premium allocated to each period is calculated as the difference between the interest expense payable for each interest payment period (calculated by multiplying the book value of the bond at the beginning of the period by the actual interest rate on the market) and the amount payable for each period.

- * According to the straight-line method: The discount or premium is distributed evenly throughout the term of the bond.

15. Principle of recording owner's equity

a. Principles for recording owners' capital contributions, capital surplus, convertible bond options, and other owners' capital

Owner's capital is recorded according to the actual capital contributed by the owner and is tracked in detail for each organization and individual contributing capital.

Shareholders' equity is recorded at the actual price of shares issued, but is reflected in two separate indicators:

- Owner's equity is recorded at the par value of the shares;
- Share capital surplus is recorded as the greater or smaller difference between the actual share issuance price and the par value.

In addition, capital surplus is also recorded as the larger or smaller difference between the actual issue price and the par value of shares when reissuing treasury shares.

b. Principles of recording undistributed profits

Undistributed profit after tax is the profit from the company's operations after adding (+) or subtracting (-) adjustments due to retroactive application of changes in accounting policies and retroactive adjustment of material errors of previous years.

The division of the company's operating profits must be in accordance with current financial policies.

The parent company shall distribute profits to owners not exceeding the undistributed profit after tax on the Consolidated Financial Statements after excluding the impact of profits recorded from bargain purchases. If the undistributed profit after tax on the Consolidated Financial Statements is higher than the undistributed profit after tax on the separate Financial Statements of the parent company and if the amount of profit decided to be distributed exceeds the undistributed profit after tax on the separate Financial Statements, the parent company shall only make distribution after transferring profits from the subsidiaries to the parent company.

When distributing profits, it is necessary to consider non-cash items in undistributed profits after tax that may affect the company's cash flow and ability to pay dividends and profits.

17. Principles of recording revenue

Revenue is recorded when it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts, rebates and sales returns. The following specific recognition criteria are also met when revenue is recorded:

Construction contract

Construction contract revenue is recorded in one of the following two cases:

- Construction contracts stipulate that contractors are paid according to planned progress: when the contract performance results are reliably estimated, revenue is recorded corresponding to the completed work portion determined by the contractor at the date of preparing the Financial Statements;
- Construction contracts stipulate that contractors are paid according to the value of the performed volume: when the results of the Contract performance are reliably estimated and confirmed by the customer, revenue is recorded corresponding to the completed work confirmed by the customer.

Contract performance increases and decreases, bonuses and other payments are only included in revenue when agreed with the customer.

When the outcome of a contract cannot be estimated reliably, revenue is recorded to the extent of the costs incurred that are reasonably certain to be recoverable.

Sales revenue

Sales revenue is recognized when all of the following conditions are met:

- The significant risks and rewards of ownership of the goods have been transferred to the buyer;
- The Company no longer holds the right to manage the goods as the owner of the goods or the right to control the goods;
- Revenue is determined relatively reliably;
- The company has obtained or will obtain economic benefits from the sale transaction;
- Identify costs associated with sales transactions.

Services revenue

Services revenue is recorded when all of the following conditions are simultaneously satisfied:

- Revenue is determined relatively reliably;
- It's possible to obtain economic benefits from the transaction of providing that service;
- Determine the completed work on the date of the Statement;
- Determine the costs incurred for the transaction and the costs to complete the transaction to provide that service.

Financial revenue

Financial revenue includes interest, royalties, dividends, profit sharing and other financial revenue. For interest from loans, deferred payment and installment sales: revenue is recorded when it is certain to be received and the loan principal and receivable principal are not classified as overdue requiring provisions. Dividend revenue is recorded when the right to receive dividends is established.

Other income

Other income includes income other than the company's production and business activities: sale and liquidation of fixed assets; fines due to customers' breach of contract; compensation from third parties to compensate for lost assets; revenue from bad debts that have been written off; debts payable with unidentified owners; income from gifts in cash or in kind...

Principles for recording construction revenue deductions

The adjustment to reduce construction revenue is made upon receiving the decision approving the final settlement of reduced construction costs from the Investor and competent authorities.

18. Principles of recording cost of goods sold

Cost of goods sold includes the capital value of products, goods, services, investment real estate; production cost of construction products sold during the period and expenses related to investment real estate business activities. The value of inventory loss or damage is recorded in the cost of goods sold after deducting compensation (if any).

19. Principles of recording financial expense

Financial expenses include financial operating expenses: expenses or losses related to financial investment activities; expenses for lending and borrowing capital; expenses for contributing capital to joint ventures and associations; losses on securities transfers; provisions for devaluation of trading securities; provisions for losses on investments in other entities; losses arising from selling foreign currencies, and exchange rate losses.

20. Principles of recording selling expenses and business management expenses

Selling expenses reflect actual costs incurred in the process of selling products, goods, and providing services.

Business management expenses reflect the general expenses of the company including expenses for salaries, social insurance, health insurance, unemployment insurance, union fees of management staff; costs of office materials, labor tools, depreciation of fixed assets used for company management; land rent, business license tax; provision for bad debts; outsourced services; other cash expenses...

Selling expenses and business management expenses are allocated to the Company's business divisions according to revenue or profit criteria.

21. Principles for recording current corporate income tax expenses

- Current income tax

Current income tax is the tax that is calculated on taxable income. Taxable income differs from accounting profit due to adjustments for temporary differences between tax and accounting, non-deductible expenses as well as adjustments for non-taxable income and losses carried forward.

Current corporate income tax expense is determined on the basis of taxable income and the current year's corporate income tax rate of 20%.

- Deferred income tax

Deferred income tax is the income tax payable or recoverable in respect of temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and their taxable amounts. Deferred income tax liabilities are recognized for all taxable temporary differences. Deferred income tax assets are recognized only when it is probable that future taxable profits will be available against which the deductible temporary differences can be utilized.

The carrying amount of deferred tax assets is reviewed at the end of each financial year and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax assets to be utilised. Previously unrecognised deferred tax assets are reviewed at the end of each financial year and recognised to the extent that it is probable that sufficient taxable profit will be available to utilise the unrecognised deferred tax assets.

DONA Transportation Construction Joint Stock Company and its subsidiaries

No. 200 Nguyen Ai Quoc, Trang Dai Ward, Dong Nai Province.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realised or the liability settled, based on tax rates that have been enacted at the balance sheet date. Deferred tax is recognised in the income statement except to the extent that it relates to items recorded directly in equity, in which case it is recorded in equity.

No. 200 Nguyen Ai Quoc, Trang Dai Ward, Dong Nai Province.

(*) Details of work in progress are as follows:

	June 30, 2025 VND	January 01, 2025 VND
- Construction cost of the "Lac Viet high-class marine eco-tourism area" project	114,224,810,433	114,224,810,433
- Other project construction costs	28,734,950,819	10,235,163,793
Total	142,959,761,252	124,459,974,226

The project "Lac Viet high-class marine eco-tourism area", DONA Transportation Construction Joint Stock Company has completed the 9-month settlement waiting period according to the technical requirements and construction quality. However, the project has not been able to carry out sand compensation as planned due to the scarcity of works from natural sand mines. Therefore, by the date of this statement's release, the project has not been accepted and handed over.

Total	(4,300,220,831)	(3,658,772,773)

VIII. OTHER INFORMATION

1. Events after the balance sheet date

No events occurred after the three-month period ending June 30, 2025, requiring adjustments or disclosures in the consolidated financial statements.

2. Stakeholders

Stakeholders are considered to be related if one party has the ability to control or significantly influence the other party in making financial and operational decisions. Parties are also considered related if they are under common control or significant influence.

In considering related party relationships, the substance of the relationship is prioritized over its legal form.

Stakeholders of the Company include: key management personnel, individuals related to key management personnel, and other stakeholders.

2.1 Transactions and balances with key management personnel and their related individuals

Key management personnel includes: members of the Board of Directors and Board of Management. Related individuals of key management personnel are close family members of key management personnel.

a. Transactions with key management personnel and their related individuals

As of June 30, 2025, the balances with key management personnel and their related individuals are as follows:

	June 30, 2025	January 01, 2025
	VND	VND
Advance payments receivable		

b. Income of key management personnel

	From January 01, 2025 to June 30, 2025	From January 01, 2024 to June 30, 2024
	VND	VND
Salaries, allowances and other income	520,172,000	585,294,000
Detailed compensation and allowances:		
Board of Directors	38,200,000	54,000,000
Board of Supervisors	30,000,000	30,000,000
Board of Management	451,972,000	501,294,000

2.2 Transactions and balances with other stakeholders

2.3 Balances with other stakeholders

- Receivables from other stakeholders are unsecured and will be settled in cash.
- As of June 30, 2025, the Company had no balances with other stakeholders requiring disclosure.

3. Segment reporting information

Segment information is presented by geographical area and business sector of the Company. The segment reporting by geographical area and business sector is based on the Company's internal reporting structure and management.

Segment reporting results include items directly attributable to a segment as well as those allocated on a reasonable basis (Revenue or Profit).

3.1. Business sector segment reporting

	From April 01, 2025 to June 30, 2025	From January 01, 2024 to June 30, 2024
	VND	VND

4. Financial Instruments

Based on Circular No. 75/2015/TT-BTC dated May 18, 2015, of the Ministry of Finance, pending the issuance of accounting standards on financial instruments and related guidance documents, the Company's Board of Management follows the guidance on not presenting and disclosing financial instruments according to Circular No. 210/2009/TT-BTC in the Company's financial statements.

5. Going Concern Information

The Group's consolidated financial statements have been prepared on a going concern basis. However, subsidiaries have announced temporary suspension of operations due to inefficiency. These conditions indicate the existence of material uncertainty that may cast significant doubt on the subsidiaries' ability to continue as going concerns.

Subsidiaries

Suspension of Operations

1. DGT - Vung Tau One Member Limited Company	Temporary suspension of operations from May 26, 2025 to May 25, 2026
2. DGT - Nghe An One Member Limited Company	Temporary suspension of operations from May 10, 2025 to May 09, 2026
3. DGT - Dong Thap One Member Limited Company	Temporary suspension of operations from April 29, 2025 to April 28, 2026
4. DGT Investment One Member Limited Company	Temporary suspension of operations from May 15, 2025 to May 14, 2026
5. DGT Construction Materials Business and Production Company Limited	Temporary suspension of operations from June 19, 2025 to June 18, 2026

5. Other Information

In 2023, the Parent Company purchased an additional 49.8% stake from two existing members of Dong Nai Company Limited to increase its ownership from 50% to 99.8%.

6. Comparative Figures

The comparative figures on the Consolidated Balance Sheet, Consolidated Income Statement, and Consolidated Cash Flow Statement are those presented in the Company's Financial Statements for the year ended December 31, 2024, which were audited by Southern Financial Accounting and Auditing Consulting Services Company Limited (AASCS).
